

Script Name:

[Form Event] [To-Do List] GDPR

Script Type:

Form Event

Overview

This script provides the functionality to click on the to-do list items generated by the GDPR to-do list script. Once clicked it will provide a prompt to say yes/no to actioning the GDPR breach. It then passes the decision on to the maintenance to action.

Dependencies

- GDPR to-do list script to enable a manager to action GDPR breaches.
- GDPR Update script to generate all the GDPR instances.
- The GDPR Maintenance script to action any GDPR you manually do.

Operation Example

- The manager will click on the GDPR task via the to-do list and be presented with an option to proceed with the GDPR rule.

Configuration

- Assigned via the To-Do List form event by going to Advanced -> Options -> Scripting (Form Event). Make sure it is the to-do list dropdown.

Notable Fields

No notable fields.
