

Script Name:

GDPR

Script Type:

To-Do List

### Overview

This script displays all the GDPR events set in the GDPR update task on the managers to-do list. The events will be clickable which enables a manager to action certain GDPR criteria. We will NEVER automatically delete any data without manual input.

### Dependencies

- GDPR Update script to have populated the GDPR SQL tables within the database.
- The GDPR to-do list form event script to enable the to-do list items to be clickable.
- The GDPR Maintenance script to action any GDPR you manually do.

### Operation Example

- Managers will log in to timeware and on his to-do list will be GDPR actionable events such as remove all biometric data if employee is a leaver etc.

### Configuration

- Assigned to the managers to-do list via the to-do list policy.

## Explanation of notable fields

<p>Private Const</p> <p>RESPECT_EMPLOYMENT_STATUS_FILTER</p> <p>Boolean = False</p>	<p>True or false statement. Choose whether to show all GDPR breaches irrespective of the Sort and Filter.</p>
