

Script Name:

Manual Deduct

Script Type:

Break

Overview

A break script to be used inside a daily schedule which will deduct the value of the break either based on the clocking times of the break or deduct the full break if they go over the break time.

Dependencies

No dependencies.

Operation Example

No operation example

Configuration

- Inside the daily schedule there is a "Standard Breaks" option. The script needs to be assigned in the script option, along with a duration and timeframe.
