

Script Name:

Standard

Script Type:

Period

Overview

The standard period schedule script which gets assigned with the 'pay periods' screen in a period schedule. Without this script many of the functions within a period schedule will not work and a form of period script is required in each period schedule.

Dependencies

No dependencies.

Operation Example

No operation example.

Configuration

- Assigned automatically against a period schedule. They are only to be replaced with other bespoke period schedule scripts.
- It CANNOT function without a script in the period schedule.
