

## BioStar 2 Integration datasheet:

# BioStar 2

### BioStar 2

Suprema is a leading global provider of access control, time & attendance and biometrics solutions.

By combining world renowned biometric algorithms with superior engineering, Suprema has introduced innovations to the security industry over the last decades.

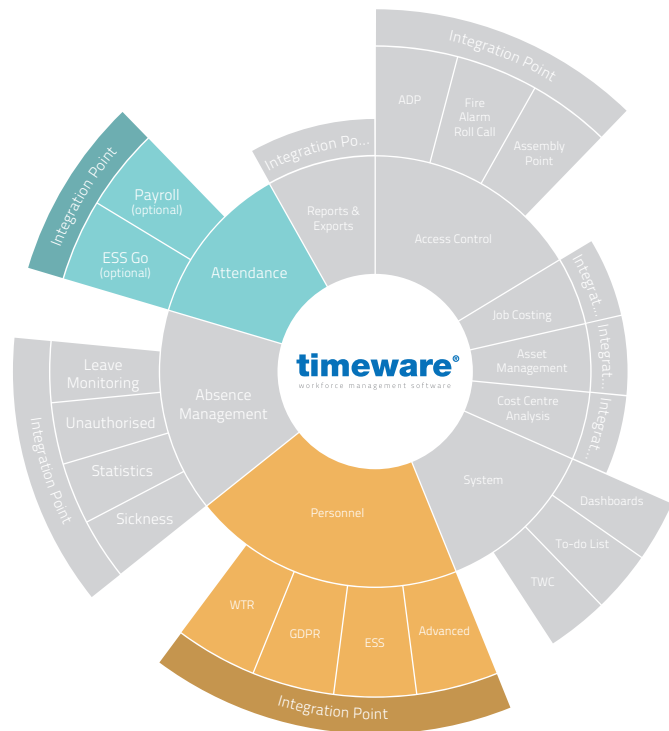

BioStar 2 from Suprema Inc. is a web-based, open, and integrated security platform that provides comprehensive functionality for access control and video log maintenance. Users can control the BioStar 2 platform remotely with a mobile app

### timeware<sup>®</sup> / Biostar 2 Integration overview

timeware<sup>®</sup> have created an integration between Biostar 2 and timeware<sup>®</sup> Small Business and timeware<sup>®</sup> Professional. This means that the timeware system can seamlessly integrate with any of the Suprema device range, and also accompany the Biostar 2 access control system.

This integration eliminates 'duplicate entry' enabling personnel/users to be created in timeware to be passed into the Biostar 2 system.

Eg: An administrator can setup a new starter in timeware, allocate them to the correct Biostar 2 access group and this will transfer across into the Biostar 2 system. Any clockings from an allocated attendance point will then transfer across into timeware as attendance bookings.
