

Script Name:

## Advance data

Script Type:

## Slider

### Overview

This script is purely for distributors only and is designed for demonstration purposes. Whenever you have a demonstration to present to a customer, we designed a database and a script where you can just run a script and have it populate data with up-to-date information. All designed to be a time saver. Only compatible with the demo database found on [www.timeware.org/downloads](http://www.timeware.org/downloads)

### Dependencies

- The demo database found on [www.timeware.org/downloads](http://www.timeware.org/downloads)

### Operation Example

- Run the script and be presented with up-to-date information so you can demonstrate.

### Configuration

- Run via the script editor.
- Requires the SQL password on the SQL\_PASSWORD line.
- May take several minutes to run.

## Explanation of notable fields

<p>Private Const SQL_PASSWORD As String = "84steps"</p>	<p>Mandatory. Your demo databases SQL password goes where it says "84steps" in the example.</p>
