

Script Name:

Attendance Anomaly

Script Type:

Email

Overview

This script produces an email via the Event Handler which contains all the attendance anomalies for a manager's employees such as missing from daily schedule and core time infringements.

Dependencies

- Functional email settings configured within Advanced -> Options -> Email Settings

Operation Example

- Each day a manager will receive an email at set times with all the anomalies that are relevant for his employees.

Configuration

- Inside the Event Handler, create an email event and select the attendance anomaly script. Select who you want to run the script for.
